

Renovation and expansion of Ekedal elderly center

During autumn 2018 we started the renovation and expansion of Ekedal elderly center (Äldrecenter). The project consists of 80 apartments in two new buildings. The first building is expected to be completed in December 2019 and the second building in June in 2020.

Why do we build new apartments?

In the coming years, the population over the age of 65 will increase by approximately 300 people in Skövde kommun. To meet the demands and the need of special care, the municipality is investing in 80 new apartments at Ekedal.

How will it affect the residents at Ekedal?

We will offer the same care as before and all activities are continuing as usual. However, the construction may involve some disturbance for residents. High levels of noise can occur in certain stages of the construction, for example, when we pile the ground and also when the new houses are being built together with the existing house.

Questions?

If you have questions, please contact one of the managers at Ekedal elderly center. You can reach them via Skövde kommun's contact center on phone 0500 - 49 80 00.
